Art Unit: 3683

1. The amendment filed 2/15/2002 and 9/10/2002 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The added recitation regarding the proposal to have small radar equipments in the amendment filed on 2-15-2002 is considered to be new matter. The added material to the brief summary and all of pages 2-5 of the amendment filed on 9/10/2002 is considered to be new matter.

Applicant is required to cancel the new matter in the reply to this Office Action.

2. The substitute specification and claims filed on 9/10/2002 have not been entered.
3. Claims 1-2 of the amendment filed 2/15/2002 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

4. The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81. No new matter may be introduced in the required drawing.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3683

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-2 of the amendment filed on 2/15/2002 are rejected under 35

U.S.C. 102(b) as being clearly anticipated by Fujita et al or Yoshioka et al.

Both Fujita et al. and Yoshioka et al. show collision prevention braking systems with alarms.

7. Any inquiry concerning this communication should be directed to Mr. Graham at telephone number (703) 308-1113.
